

PROFILE SUMMARY

Bachelor's degree in Software Engineering or a related field with a strong foundation in software development principles. Proficient in Java and Python with hands-on experience in problem-solving and coding. Familiar with collaborative development, code reviews, and learning new tools and technologies. Eager to contribute to real-world software projects and grow as a software engineer.

PROJECTS

1. Flight Scheduling Optimization System

Tech Stack: Python, Pandas, NumPy, Reinforcement Learning.

- Designed an AI-based optimization system using Constraint Programming and Reinforcement Learning to improve flight slot allocation.
- Processed and analyzed large-scale datasets to identify congestion patterns, achieving a 20–25% reduction in delays.
- Built an NLP-based interface to query busiest slots and high-impact flights, improving decision-making efficiency.

2. AskMe – Intelligent Chatbot

Tech Stack: React, JavaScript, HTML, CSS.

- Developed a scalable chatbot application to answer technical queries on DSA, AI/ML, OS, and DBMS.
- Focused on clean component design and separation of concerns for maintainability.
- Designed the application for future integration with ML models and backend APIs.

3. NoteSphere – Responsive Notes Management System

Tech Stack: HTML, CSS, JavaScript, SQL.

- Developed a responsive web application for creating, viewing, and deleting notes.
- Designed a clean and intuitive UI with mobile-first responsiveness.
- Performed debugging and basic testing during development using logs and test cases.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, C, JavaScript
- Web Technologies:** HTML, CSS, React, REST APIs
- Data Structures & Algorithms:** Arrays, Strings, OOPS
- Databases:** SQL, MongoDB (NoSQL)
- AI / ML:** Machine Learning fundamentals, NLP basics, Reinforcement Learning
- Tools & Platforms:** GitHub, Streamlit, Pandas, NumPy

EDUCATION

K.L.N. COLLEGE OF ENGINEERING

2022 - 2026

Bachelor of Technology (B.Tech) – **Artificial Intelligence & Data Science**

CGPA: 8.11 | Expected Graduation: 2026

VHN Higher Secondary School

2021 - 2022

HSC with 69.3%

CERTIFICATION

- DSA Workshop – NIT Trichy | 2024**
- Java & C Programming – Udemy | 2025**
- Python Programming – HackerRank | 2025**
